

## **PSYCHIATRISTS IN MOBILE & BALDWIN COUNTIES -- 6/2017**

*Notes:*

- This list is intended to be nothing more than a convenience to our patients as they search for a psychiatrist to continue their care.
- Presence of a psychiatrist on this list is not intended as a referral to or a positive recommendation of that physician. Absence from this list is not intended to be a negative recommendation.
- This list is not complete and any part of it may be inaccurate.
- I do not know some of these physicians.
- I cannot vouch for the credentials, quality, or ability of anyone on this list or their appropriateness for any particular patient.
- Some physicians on this list may not be accepting new patients or patients with certain diagnoses.
- Some may not see particular age ranges, particularly children or teens.
- Some may not accept your insurance.
- There may be excellent psychiatrists in other nearby counties or adjacent states. A distant physician is better than stopping treatment.
- Some primary care physicians may be willing to assume your treatment -- either indefinitely or at least until you can make permanent arrangements. This may or may not be wise.
- Be comfortable with your new doctor. Move on if you are not.
- Urgent-care clinics should not be used for long-term care of any condition, especially psychiatric diagnoses.
- Complex psychiatric problems, including ADHD, should be managed by physicians rather than non-physician practitioners.
- Remember that no physician is required to accept a diagnosis from or continue a treatment of any other physician.

JIB
